

Specification Data Sheet

Rev 1.0 August 2017

Armour Home Electronics R&D Department

Systemline E100 and E50 both have the capability to connect an analogue audio source via the rear 3.5mm stereo jack socket. In order to 1st fix the cable, and terminate this neatly into a wall box, the audio connection pack contains the items you need. Included is a 10m audio cable, one end can be inserted into the E series box and plugged into the socket, the other can be fitted to a wall back box and then cut to the desired length. The audio connection plate has screw terminals on the rear for the cable, and can then be inserted into a 1 gang Euro data fascia 25mm x 50mm, to match other electrical sockets.
